Project Case Study

Dental Office Venice, Italy

Dental Office, Venice, Italy

The construction of a new dental office afforded the ability to completely outfit the operation with automation equipment. The facility, utilized by 20 doctors, has 15 operating rooms, 8 offices, a meeting area, a large reception and waiting room, a hospitality suite, and a sterilization room – all outfitted with automation. Essential to the owner of the dental office was distributed audio for client comfort and security with video surveillance for peace of mind. Remote management of the property was crucial, with control of security, lighting, and HVAC from an iPhone or PC. ■
