HAI’s home automation systems can be installed in both new home construction and existing homes.

HAI products are sold through a worldwide network of distributors and are installed by dealers in over 80 countries. For information on any of HAI’s award-winning products, please visit www.homeauto.com to contact HAI or an HAI dealer near you.

HAI: A proven record of reliable, and award-winning products since 1985.

www.homeauto.com

Home Automation, Inc. (HAI) was formed in 1985 to provide automation products to the newly emerging automation and controls market. HAI is responsible for many industry firsts including the first integrated security and automation system on the market and the first Internet remote access and control software for residential use. As HAI’s product line has grown, the benefits of merging energy conservation with security and remote access has played a larger part in the core of HAI’s efforts. HAI’s products are available in over 80 countries worldwide.

Convenient Interfaces for Home Automation

Comfortably control security, temperature, lighting, entertainment, surveillance video, irrigation, and more.

HAI provides more interface options for your home than ever before: iPhone, iPad, Android device, and Touchscreen. You are always in control.
 OmniTouch Pro
HAI’s touchscreen interface application for a PC or PC touchscreen. Provides access and control for home systems and includes settings for over a dozen languages.

HAI OmniTouch 5.7e
This Touchscreen includes all the features of the standard 5.7 but adds PoE (Power over Ethernet), video intercom, real-time information from an RSS feed, and a customizable graphical interface.

HAI OmniTouch 5.7
With a 5.7 inch full color display, this plug-and-play Touchscreen provides easy access to all home functions. A table-top version is also available.

HAI Telephone Access
A simple phone call to your system can provide either direct control of systems, or just an opportunity to check on your home’s status. Out of town for the week and want to ensure your security system is armed and the outside lights are on? Dial in and know for certain.

Wireless Key Fob, Keypad, & Panic-Alert Pendant
Add convenience to the control of your home systems. With the push of a button, lights activate and other systems such as access control respond accordingly.

HAI Lumina Mode Switch
With one button you can change lights, audio, and temperature to create the perfect environment for dining, entertaining, or viewing a movie.

Multiple options exist to control your home, whether you’re home or away. Check and adjust lighting, temperature, security, audio, and more from HAI’s easy to use Touchscreen interfaces.

HAI offers video surveillance and recording, which gives you the power to check on your home via PC or web-enabled phone. Colorful Touchscreens provide control of your systems via recognizable icons.

Enjoy the convenience of wireless door lock technology. Lock and unlock up to 16 doors via Touchscreens or mobile Apple/Android devices.

With HAI software choices, you can make changes to your home’s status from practically anywhere in the world. Call to check on and change the status of your home, or control systems directly from your cell phone. HAI offers solutions that simplify your life.

Snap-Link
Using Snap-Link Mobile, graphically control your home via an iPhone, iPad, iPod Touch, or Android device. Quickly adjust and check lights, temperature, webcams, security and more on the go! Or plug the Snap-Link USB key into any Windows computer and it will direct communicate through the secure Ethernet port on your HAI system at home.

Custom Designs & Programs
HAI’s software for designing custom OmniTouch 5.7e and 10pe Touchscreen interfaces lets you navigate the home through a graphical floor plan or an interface based on a personalized theme. Advanced users can set up and program systems with PC Access software. Change user codes, lighting, schedules, temperatures, display languages, and see your home’s status.

Home Control for Windows Media Center
This software runs on a Windows Media Center computer to control lighting, temperatures, and security via your television with a single remote control. Change lighting, temperature, and security as easily as changing a channel!

Home Control Mobile Apps
Graphically control your home systems via iPhone, iPad, iPod Touch, or Android device. View live surveillance video and control all your automated home systems remotely.
